of treatment for Collagen and Botox®

-

BOTOX®

BOTOX® is a therapeutic muscle-relaxing agent that works at motor nerve endings (nerves that leads to muscles). It is in a class of drugs called neurotoxins.

BOTOX® has been used for many years to treat blepharospasm. More recently it has been used to improve the appearance of worry lines, frown lines, Crow's feet, lip lines, descent of the eyebrows, and neck muscle bands.

Collagen
Replacement Therapy

Zyderm® and Zyplast® collagen implants are a fast, safe, nonsurgical way to reduce the appearance of facial lines and wrinkles. The procedure is performed in the office. You can smooth facial lines, wrinkles, and scars, as well as enhance the lip border in just one treatment session and see immediate, visible results.

-

Restylane

Clinical
studies show that patients who were injected with

Restylane for the treatment of facial folds achieved an optimal cosmetic result. the results were sustained for a longer period of time than collagen.]
