

Radiesse

Dr. Wigoda uses Radiesse® for his Fort Lauderdale clients to fill in facial lines and wrinkles. Dr. Wigoda examines each patient and recommends the best dermal filler for each client. Call us today for your free consultation and find out if Fort Lauderdale Radiesse by Dr. Wigoda is for you.

What is Radiesse dermal filler?

Radiesse dermal filler is setting a new standard for the correction of facial lines and wrinkles. Radiesse is made of calcium-based microspheres suspended in a water-based gel, and is injected into the skin through a simple and minimally invasive procedure. Radiesse gives you immediate and noticeable improvement of wrinkles and folds, which may last a year or more in many patients.

How does Radiesse dermal filler work?

Upon injection, Radiesse actually stimulates the body to produce more of its own natural collagen. This helps to provide long-lasting wrinkle protection in as little as one or two office visits. The long-lasting effects of Radiesse dermal filler can reduce the need for re-treatment, which saves you time and money compared with other fillers.

Is Radiesse dermal filler safe?

Yes. Radiesse has been clinically tested extensively for years, with excellent efficacy and safety results. It has received two FDA approvals and a number of FDA clearances, as well as a CE mark of certification. Since Radiesse is made of a biocompatible substance identical to what is naturally found in the body, there is virtually no chance of allergic reaction. Very few side effects have been reported in clinical trials or actual use.
